

# Comprehensive range of Truck & Heavy Equipment Batteries to suit all of your Commercial application needs

## Ultra Hi Performance Commercial

- Calcium technology for the highest cranking outputs available.
- Sealed lids for maintenance free operation and safety.
- Fibreglass backed separators for vibration resistance and capacity retention.
- The commonly specified product design for OE applications.
- Ideal for all long haul trucks with low cyclic demands.
- Up to 24 months, or 160,000km warranty.

## Hi Performance Commercial

- Antimonial grids for improved cyclic performance.
- Maintainable design for maximum control over battery life
- Fibreglass backed separators for vibration resistance and capacity retention
- Thicker cast grids for greater strength and longevity.
- Ideal for applications with hiabs and tail lifts.
- Up to 24 months or 120,000km warranty.

## Severe Service

- Both antimonial low maintenance and calcium valve regulating designs.
- Extra thick plates to better cope with applications where cyclic use is required (tail lifts, hiabs, taxis, idle stop start technology and couriers).
- Thick fibreglass separators for improved active material retention and vibration resistance.
- A extensive range to suit common automotive applications right through to large trucks with 12V parallel strings.
- Up to 24 months or 120,000km warranty.

### Customers can be assured of receiving:

- Quality product and service you can depend on
- Reliable stock availability all throughout New Zealand
- A comprehensive range of premium products to meet all of your lead acid battery requirements
- Expert battery knowledge for technical backup and advice
