**SEALANTS & GREASE**

PART NUMBER	DESCRIPTION	SIZE	APPLICATION
V591247	Sealing Compound	1 Kg Tin	A sealing and rustproofing agent for pipe connections, flanges, threads etc. in exhaust systems etc. Does not damage the gasket material even when operating temperatures are high
V1161277	Sealant - Black	20 gram Tube	General sealing/gasket duties. Good adhesion on glass and metals, resistant to chemicals. Excellent for applications in which water and moisture are present. Age resistant
V1161231	Sealant - Black	300ml Cartridge	
V1161241	Lube Grease Li/EP	80 gram	Wheel bearing grease is a lithium complex mineral oil based grease with EP additives. The grease is recommended as a universal grease for all ball and roller bearings which are used in both high and low temperatures.
V1161247	Grease Paste	500 gram Cartridge	High grade grease paste recommended for lubrication of splines, link bearings, oscillating plain bearing/sliding surfaces.
V1161326	White Silicon Grease	50 gram Tube	Recommended for lubrication points subjected to low ambient temperatures. Suitable for lubricating between plastic/plastic and plastic/metal.
V1161358	Grease	80 gram Tube	Recommended for ball, roller and clutch release bearings which work under high loading and high temperatures.
V1161417	Grease	30 gram Tube	A special grease recommended for low temperatures and loadings.. The grease is specially suitable for controls, hinges, lock components and for greasing electric contacts, switches etc.
V1161434	Adhesive	3 gram Tube	A fast setting all round adhesive for use where an extremely short setting time is required. The adhesive sets I 10 seconds after assembly, maximum strength is only reached after 3 hours, when the joint has a tensile strength of up to 30 N/mm2. Sticks to metal, plastics, rubber, leather, paper, and china.
M1161929	Joint Paste Anti-Seize	250 gram Tin	The product has an excellent lubricating and release properties over a wide temperature range without affecting the material in the bolted joint.
V1161963	Grease Low Temp	50 gram Tube	A Lithium complex thickened lubricant grease with polyalpha olefin as its base oil. Can be used over an extremely wide range of temperatures, because of its high drop point combined with exceptional oxidation-resistance and low base oil evaporation.
V3092340	Sealant - Grey	310 ml Tube	Application area: seals and gaskets for engines, transmissions, cooling systems and other hatches, openings and covers. Excellent adhesion on most materials including plastics. Resistant to engine and transmission oils, glycol and water, but not petrol. Withstands UV light, age resistant, replaces most rubber and cork gasket/seals.
V8155615	Adhesive	2 x 200 ml Tubes	A two-component sealing agent. It is used for sealing cable boxes between the engine compartment and truck cabs. The material also acts as a fire barrier.
